

13. CONSIDERATION OF ELEVATED TANK COLORS

Attached for your consideration please find a copy of the color chart for the Turner Tract Elevated Water Tank for your use in selecting a color for the tank. The current contract provides for the entire tank to be painted with one color with no striping or logo.

Our existing tanks are in the white or light blue family – the design engineer has suggested that many clients are now gravitating to lighter beige colors because they don't show dirt and grime as much.

MOTION REQUIRED:

A motion is required to select the color of the water tank.

RE: Color Chart – Turner Tract Elevated Tank

Dear Mr. Johnson:

Enclosed, please find one (1) copy of the Color Chart for the Turner Tract Elevated Tank for your use in selecting a color for the tank. The current contract calls for the entire tank to be painted the same color with no striping or logo. The county's existing tanks are mostly light blue but we have seen a trend of clients going with the lighter beige colors since they look nice and don't show dirt as much as the white or blue tanks do.

I know this can be a difficult decision so if I can be of assistance, please feel free to contact me at (804) 200-6385.

Respectfully Submitted,

Wes Hunnius, P.E.
Project Manager

C.T.I. Project No. E-7644

Please note the following comments while reviewing the enclosed paint schedule drawing and data sheets.

1. The paint system has been detailed in accordance with the project specifications using Temec coatings as specified.
2. Please indicate the finish tank color on Drawing P1. See the enclosed chart for color selection.

Please feel free to call with any questions or comments. Please return one set of paint schedule drawing and data sheets with your approval and/or comments.

Sincerely,

A handwritten signature in black ink, appearing to read "John Havron", is written over a light blue horizontal line.

John Havron
