Subject: Proposed Courtland Interchange - Need County Concurrence for Grade Separated Design
Importance: Low

Mike:

The Courtland Interchange project is on the Governor's Initiative List of projects that received additional funding to begin construction by FY 2014.

It appears that the County Board of Supervisors accepted a proposed at-grade design at this location in July 2009. From my discussions with our design staff, the at-grade design was an alternative to the original grade separated design due to the available funding on the project during that time. However, based on the additional funds that are being allocated to the project from the Governor's package, the project will now be designed as a grade separated interchange.

VDOT has submitted a RFP to obtain a design consultant to complete the engineering and design of the project. Right of Way Acquisition is scheduled to begin in FY 2013 and construction in FY 2014.

The current estimated costs for this project are as follows:

PE	\$2,717,312
RW	\$1,245,406
CN	\$24,304,765
Total	\$28,267,483

I have attached the conceptual design for your reference. Please review and provide a written response that the County concurs with the proposed grade separated interchange.

If you have any questions or need additional information, please let me know.

Thanks,
Sonya
